This document comprises a front cover, an inside front cover, pages i to ii, pages 1 to 8, an inside back cover and a back cover.

Foreword

Publishing information

This part of BS 8599 is published by BSI Standards Limited, under licence from The British Standards Institution, and came into effect on 31 January 2014. It was prepared by Technical Committee CH/240, *First aid kits*. A list of organizations represented on this committee can be obtained on request to its secretary.

Relationship with other publications

This part of BS 8599 is part of a series that contains the following parts:

- *Part 1: Specification for the contents of workplace first aid kits*
- *Part 2: Specification for the contents of motor vehicle first aid kits*

Presentational conventions

The provisions of this standard are presented in roman (i.e. upright) type. Its requirements are expressed in sentences in which the principal auxiliary verb is "shall".

Commentary, explanation and general informative material is presented in smaller italic type, and does not constitute a normative element.

Requirements in this standard are drafted in accordance with *Rules for the structure and drafting of UK standards*, subclause J.1.1, which states, "Requirements should be expressed using wording such as: 'When tested as described in Annex A, the product shall ...'". This means that only those products that are capable of passing the specified test will be deemed to conform to this standard.

Contractual and legal considerations

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

Compliance with a British Standard cannot confer immunity from legal obligations.

1 Scope

This part of BS 8599 specifies requirements for the compilation of first aid components in three sizes of first aid kits (small, medium and large) for use in motor vehicles.

Requirements are also given for the container holding the components.

NOTE 1 Motor vehicle first aid kits can be complemented by other items that have been identified during a risk assessment. Where there are unusual hazards that are specific to a particular use of a vehicle, such as vehicles carrying dangerous chemicals (e.g. hydrofluoric acid), first aid kits might need to be supplemented with additional appropriate components.

NOTE 2 Annex A gives recommendations on the number and size of the first aid kits necessary for different vehicle types and numbers of passengers.

NOTE 3 Annex B gives details of vehicle categories as defined by the European Commission [1].

NOTE 4 A workplace risk assessment might determine that the vehicle motor kit is suitable for a lone worker.

2 Normative references

The following documents, in whole or in part, are normatively referenced in this document and are indispensable for its application. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

BS 7505:1995, *Specification for the elastic properties of flat, non-adhesive, extensible fabric bandages*

BS EN 455-1, *Medical gloves for single use – Part 1: Requirements and testing for freedom from holes*

BS EN 455-2, *Medical gloves for single use – Part 2: Requirements and testing for physical properties*

BS EN ISO 7010:2012, *Graphical symbols – Safety colours and safety signs – Registered safety signs*

3 Terms and definitions

For the purposes of this part of BS 8599, the following terms and definitions apply.

3.1 emergency dressing

absorbent wound contact pad attached to a bandage for use on lacerations and cuts to skin

[SOURCE: BS 8599-1:2011, 3.1]

3.2 first aid kit container

vessel used to hold first aid components, facilitating easy transportation and retrieval

NOTE Typically this can be a box, case or bag.

[SOURCE: BS 8599-1:2011, 3.2]

3.3 motorcycle

powered two or three wheeled motor vehicle whose weight does not exceed 400 kg
