

BSI Standards Publication

**Graphical symbols for diagrams - Guidance on
design for standardization in IEC 60617**

National foreword

This Published Document is the UK implementation of IEC TS 63064:2018.

The UK participation in its preparation was entrusted to Technical Committee GEL/3, Documentation and graphical symbols.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

CONTENTS

FOREWORD.....	3
1 Scope.....	5
2 Normative references	5
3 Terms and definitions	5
4 Concept considerations	7
4.1 General.....	7
4.2 Shape of graphical symbols for diagrams.....	8
4.3 Operational states.....	8
4.4 Qualifying symbols.....	8
5 Grids and module	8
5.1 Orthogonal grid system	8
5.2 Layers for designing graphical symbols for diagrams	9
5.3 Drawing of symbols for diagrams	9
5.4 Margin	9
5.5 File format	9
6 Design process for graphical symbols for diagrams	9
7 Requirements for designing graphical symbols for diagrams.....	10
7.1 General.....	10
7.2 Line width	10
7.3 Lines and arcs	10
7.4 Line end type	11
7.5 Line corner type.....	11
7.6 Minimum space between parallel lines	11
7.7 Hatched and filled areas	11
7.8 Connect node	12
7.9 Position of a connect node.....	12
7.10 Terminal lines and anticipated connections	12
7.11 Reference point	12
7.12 Text	12
Annex A (informative) Specification of orthogonal grid system and examples of its application.....	13
A.1 Specification of electronic orthogonal grid system.....	13
A.2 Example of the application of the orthogonal grid system.....	14
Bibliography.....	15
Figure 1 – IEC 60617 graphical symbols for diagrams for basic concept	7
Figure 2 – Coded line end type 1	11
Figure 3 – Coded line corner type 1	11
Figure A.1 – Example of visualization of the electronic orthogonal grid system of M = 2,5 mm in 16 rows and 16 columns	13
Figure A.2 – Example of application of the orthogonal grid system of M = 2,5 mm visualized layer-by-layer	14

INTERNATIONAL ELECTROTECHNICAL COMMISSION

**GRAPHICAL SYMBOLS FOR DIAGRAMS – GUIDANCE ON DESIGN
FOR STANDARDIZATION IN IEC 60617**

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

The main task of IEC technical committees is to prepare International Standards. In exceptional circumstances, a technical committee may propose the publication of a Technical Specification when

- the required support cannot be obtained for the publication of an International Standard, despite repeated efforts, or
- the subject is still under technical development or where, for any other reason, there is the future but no immediate possibility of an agreement on an International Standard.

Technical Specifications are subject to review within three years of publication to decide whether they can be transformed into International Standards.

IEC TS 63064, which is a Technical Specification, has been prepared by IEC technical committee 3: Information structures and elements, identification and marking principles, documentation and graphical symbols.

The text of this Technical Specification is based on the following documents:

Draft TS	Report on voting
3/1309/DTS	3/1329/RVDTS

Full information on the voting for the approval of this Technical Specification can be found in the report on voting indicated in the above table.

This document has been drafted in accordance with the ISO/IEC Directives, Part 2.

The committee has decided that the contents of this document will remain unchanged until the stability date indicated on the IEC website under "<http://webstore.iec.ch>" in the data related to the specific document. At this date, the document will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

A bilingual version of this publication may be issued at a later date.

IMPORTANT – The 'colour inside' logo on the cover page of this publication indicates that it contains colours which are considered to be useful for the correct understanding of its contents. Users should therefore print this document using a colour printer.

GRAPHICAL SYMBOLS FOR DIAGRAMS – GUIDANCE ON DESIGN FOR STANDARDIZATION IN IEC 60617

1 Scope

This document gives guidance and basic principles on how to design graphical symbols for diagrams for standardization and inclusion in IEC 60617.

This document does not specify how to apply such graphical symbols in the diagrams.

2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

IEC 60027 (all parts), *Letter symbols to be used in electrical technology*

IEC 60617, *Graphical symbols for diagrams* (available at <http://std.iec.ch/iec60617>)

IEC 62744:2014, *Representation of states of objects by graphical symbols*

IEC 80000 (all parts), *Quantities and units*

IEC 81714-2:2006 *Design of graphical symbols for use in the technical documentation of products – Part 2: Specification for graphical symbols in a computer-sensible form including graphical symbols for a reference library, and requirements for their interchange*

ISO 128-20:1996, *Technical drawings – General principles of presentation – Part 20: Basic conventions for lines*

ISO 14617 (all parts), *Graphical symbols for diagrams*

ISO 80000 (all parts), *Quantities and units*

ISO 81714-1:2010, *Design of graphical symbols for use in the technical documentation of products – Part 1: Basic rules*

Drawing grid template, available at
