

Australian/New Zealand Standard™

**In-service safety inspection and
testing—Second-hand equipment prior
to sale**

AS/NZS 5761:2011

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee EL-036, In-service Testing of Electrical Equipment. It was approved on behalf of the Council of Standards Australia on 6 July 2011 and on behalf of the Council of Standards New Zealand on 21 July 2011. This Standard was published on 4 August 2011.

The following are represented on Committee EL-036:

Australian Chamber of Commerce and Industry
Australian Industry Group (AIG)
Australasian Lighting Industry Association
Building Service Contractors of New Zealand (Inc.)
Consulting Interests Australia
Consulting Interests New Zealand
Consumer Electronic Suppliers' Association
Department of Labour New Zealand
Department Fair Trading, New South Wales Consumer Protection Agency
ElectroTechnical Association Inc
Energy Safe Victoria
Hire and Rental Association Australia
Hire Industry Association of New Zealand
Housing Industry Association Australia
Institute of Electrical Inspectors Australia
Joint Accreditation System of Australia and New Zealand (JAS-ANZ)
Ministry of Consumer Affairs New Zealand
Ministry of Economic Development New Zealand
National Electrical and Communications Association Australia
New Zealand Electric Fence Energizers Manufacturers' Standards Working Group
New Zealand Council of Elders
Safety Institute of Australia
Schneider Electric Limited New Zealand
WorkCover New South Wales

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Web Shop at www.saiglobal.com.au or Standards New Zealand web site at www.standards.co.nz and looking up the relevant Standard in the on-line catalogue.

For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of either Standards Australia or Standards New Zealand at the address shown on the back cover.

This Standard was issued in draft form for comment as DR 5761.

FOREWORD

The objective of this Standard is to ensure, in both Australia and New Zealand, the safety of subsequent users of second-hand electrical equipment intended for connection to the electrical supply mains, by providing to the seller, a regime for general safety inspection and testing. This will include not only electrical hazards but also other hazards such as non-working mechanical guards and cut-out devices.

This edition has undergone a substantial revision extending its scope so that the new owner receives an electrical item which has undergone an inspection and testing process encompassing safety aspects other than just electric shock concerns.

OUTCOME STATEMENT

AS/NZS 5761 will, by providing a regime for general safety inspection and testing, assist sellers of second-hand electrical equipment to provide equipment which is safe to use. The Standard covers both electrical aspects of equipment and mechanical aspects such as guards and cut-out devices.

STANDARDS AUSTRALIA/STANDARDS NEW ZEALAND

Australian/New Zealand Standard
In-service safety inspection and testing –
Second-hand electrical equipment
prior to sale

SECTION 1 SCOPE AND GENERAL

1.1 SCOPE

This Standard specifies procedures which shall be applied to household and similar electrical equipment, as detailed in Appendix A, prior to it being offered for sale. This equipment is intended for use in both domestic and workplace environments.

The procedures include not only the safety inspection and testing of low voltage single phase and polyphase **second-hand equipment** but also confirmation that safety measures such as mechanical guards are fitted and working correctly.

1.2 EXCEPTIONS

1.2.1

This Standard shall not apply where an item has been treated in accordance with the provisions of AS/NZS 4701.

1.2.2

This Standard does not apply to equipment whose nature is that of a medical device as defined in AS/NZS 3551.

1.3 INTERPRETATION

1.3.1

The terms 'normative' and 'informative' have been used in this Standard to define the application of the appendix to which they apply. A 'normative' appendix is an integral part of a Standard while an 'informative' appendix is provided for information and guidance, and may indicate good practice. Non-compliance with an informative appendix shall not be seen as non-compliance with the Standard.

1.3.2

For the purposes of this Standard, the word 'shall' refers to requirements that are essential for compliance with this Standard, while the word 'should' refers to practices that are advised or recommended.

1.3.3

Words in **bold** in the text are defined in Clause 1.5 or in AS/NZS 3760.
