

Australian Standard™

**Fresh cut flowers and foliage—
Australian and related flora**

**Part 1: General and postharvest vase
life requirements**

This Australian Standard was prepared by Committee CS-090, Horticulture. It was approved on behalf of the Council of Standards Australia on 15 March 2004 and published on 18 June 2004.

The following are represented on Committee CS-090:

Arboricultural Association of Australia (Vic.) Inc.
Australian Flower Export Council
Australian Institute of Horticulture
Electricity Supply Association of Australia
Environment Australia Biodiversity Group
Institute of Land and Food Resources
Ministry of Economic Development (New Zealand)
National Arborists Association of Australia
Nursery and Garden Industry of Australia

Additional interests participating in the preparation of this Standard:

Australian Flora and Protea Growers Association
Department of Agriculture WA
Department of Primary Industries Victoria
Flower Association of Queensland Inc
Flowers Victoria
NSW Agriculture
Queensland Wax & Native Flower Association
University of Western Australia

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about Standards can be found by visiting the Standards Web Shop at www.standards.com.au and looking up the relevant Standard in the on-line catalogue.

Alternatively, the printed Catalogue provides information current at 1 January each year, and the monthly magazine, *The Global Standard*, has a full listing of revisions and amendments published each month.

Australian Standards™ and other products and services developed by Standards Australia are published and distributed under contract by SAI Global, which operates the Standards Web Shop.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at mail@standards.org.au, or write to the Chief Executive, Standards Australia International Ltd, GPO Box 5420, Sydney, NSW 2001.

This Standard was issued in draft form for comment as DR 99071.

PREFACE

This Standard was prepared by the Standards Australia Committee CS-090, Horticulture. The series of Standards was proposed by the Australian Flower Export Council who had expressed concern that substantial markets could be lost if the quality of fresh cut flowers is not improved. A Standard could also open the way to further markets and improve the quality of flowers for domestic sale.

This Standard is based on industry standards developed by the Australian Flower Export Council and the Queensland Wax and Native Flower Association.

The postharvest vase life test is based on an industry standard initially developed for waxflower (*Chamelaucium* spp.) by CSIRO Division of Horticulture.

The aim of the series of Standards is to improve the quality of fresh cut flowers and foliage of Australian and related species for export by setting minimum specifications to maintain the potential of the product at the point of export.

The AS 4689 series of Standards sets out general and product packaging requirements in Part 1. Part 1 includes a postharvest vase life test, the aim of which is to provide a test that can be used to compare batches of flowers or foliage. The remaining Parts contain specific requirements for particular flowers or foliage. This series of Standards is intended for use by flower producers and exporters within Australia.

This is Part 1 of AS 4689 series which comprises 7 Parts as follows:

AS

- 4689.1 Part 1: General and postharvest vase life requirements
- 4689.2 Part 2: *Anigozanthos* (kangaroo paw)
- 4689.3 Part 3: *Banksia*
- 4689.4 Part 4: *Caustis blakei* (koala fern)
- 4689.5 Part 5: *Chamelaucium* (waxflower)
- 4689.6 Part 6: *Ozothamnus diosmifolius* syn. *Helichrysum diosmifolium* (rice flower)
- 4689.7 Part 7: *Telopea* (waratah)

STANDARDS AUSTRALIA

Australian Standard

Fresh cut flowers and foliage—Australian and related flora

Part 1: General and postharvest vase life requirements

1 SCOPE

This Standard sets out minimum general and specific characteristics of fresh cut flowers and foliage for Australian and related flora grown in Australia. It includes requirements and guidelines on how to achieve the appropriate freshness and quality, storage conditions, longevity (postharvest vase life), packaging and labelling criteria required to ensure the best possible quality product for export.

The Standard does not apply to dried flowers and does not include information on operational matters or market specific requirements.

2 OBJECTIVE

The objective of this Standard is to provide growers, suppliers, exporters and purchasers with minimum specifications for selected native flowers and foliage for export, and enable use of these criteria to assist in evaluating, selecting or achieving the consistency in quality required for export.

3 REFERENCED DOCUMENTS

The following documents are referred to in this Standard:

AS

4689	Fresh cut flowers and foliage—Australian and related flora
4689.2	Part 2: <i>Anigozanthos</i> (kangaroo paw)
4689.3	Part 3: <i>Banksia</i>
4689.4	Part 4: <i>Caustis blakei</i> (koala fern)
4689.5	Part 5: <i>Chamelaucium</i> (waxflower)
4689.6	Part 6: <i>Ozothamnus diosmifolius</i> syn. <i>Helichrysum diosmifolium</i> (riceflower)
4689.7	Part 7: <i>Telopea</i> (waratah)
2852	Packaging—Pictorial marking for the handling of packages

4 DEFINITIONS

For the purpose of this Standard the definitions below apply.

4.1 Described cultivar

A cultivar that has been described in sufficient detail to distinguish it from other similar products. The description is generally used by the academic, production and export sectors of the industry.

4.2 Mature

The particular stage of development of a flower or foliage when the stem is harvested to ensure maximum postharvest vase life.

NOTE: Photographs are included of all products in AS 4689, parts 2 to 7, to illustrate the ideal stage for harvesting.
