DEPARTMENT OF DEFENSE
HANDBOOK
SUPPORT EQUIPMENT
DATA SOURCES

**This handbook is for guidance only.
Do not cite this document as a requirement.**

AMSC N/A **AREA MISC**
DISTRIBUTION STATEMENT A. Approved for public release; distribution unlimited.

FOREWORD

1. This handbook is approved for use by all Department and Agencies of the Department of Defense (DoD).
2. This handbook is for guidance only. This handbook cannot be cited as a requirement. If it is, the contractor does not have to comply.
3. This handbook is intended to be a DoD Support Equipment (SE) data sources guide. It can be used to research SE in the DoD inventory that could potentially fulfill a specific required function. This handbook outlines references to data sources which could provide sufficient information on a piece of SE so it may be considered for an application. Data sources outlined in this handbook will enable effective searches of assets in the DoD inventory and lead to SE data that could feed the Support Equipment Recommendation Data (SERD) process. Use of this handbook is intended to provide for maximum utilization of existing DoD assets, thus minimizing duplicate design or development of support equipment for various weapon systems.
3. Significant changes have been made in this revision. The scope and intent of this document have been adjusted to guide users to sources of data in lieu of a link to a single database.
4. Comments, suggestions, or questions on this document should be addressed to AFLCMC/LG-LZ Product Support Division, AFLCMC/LZS, 1790 Tenth Street, Wright-Patterson AFB, OH, 45433 or emailed to aflcmc.lzs@us.af.mil. Since contact information can change, you may want to verify the currency of this address information using the ASSIST Online database at <https://assist.dla.mil>.

1. SCOPE. This document is intended to aid users in identifying viable SE data sources, searching existing SE assets, and obtaining data which could be used to determine if SE exists in the DoD inventory that could be used for a specific application and to generate a SERD. This handbook is for guidance only. This handbook cannot be cited as a requirement. If it is, the contractor does not have to comply.

2. APPLICABLE DOCUMENTS

2.1 General. The documents listed below are not necessarily all of the documents referenced herein, but are those needed to understand the information provided by this handbook.

2.2 Government documents. A variety of DoD manuals, technical orders (TOs), and websites have been referenced in the creation of this document.

2.2.1 Other Government documents, drawings, and publications. The following Government systems, documents, or websites form a part of this document to the extent specified herein.

3. DEFINITIONS

3.1 Support equipment. Support equipment is all equipment required to make a weapon system, command and control system, support system, subsystem, or item of SE operational in its intended environment. This includes all equipment required to install, launch, arrest (except Navy shipboard and shore-based launching and arresting equipment), guide, control, direct, inspect, test, adjust, calibrate, appraise, gauge, measure, assemble, disassemble, handle, transport, safeguard, store, actuate, service, repair, overhaul, maintain,
