## Zhaga Interface Specification Book 18 including Book 1 — Outdoor Luminaire Extension Interface

---

## National foreword

This Published Document is the UK implementation of IEC PAS 63421:2022.

The UK participation in its preparation was entrusted to Technical Committee CPL/34, Lamps and Related Equipment.

A list of organizations represented on this committee can be obtained on request to its committee manager.

### Contractual and legal considerations

This publication has been prepared in good faith, however no representation, warranty, assurance or undertaking (express or implied) is or will be made, and no responsibility or liability is or will be accepted by BSI in relation to the adequacy, accuracy, completeness or reasonableness of this publication. All and any such responsibility and liability is expressly disclaimed to the full extent permitted by the law.

This publication is provided as is, and is to be used at the recipient's own risk.

The recipient is advised to consider seeking professional guidance with respect to its use of this publication.

This publication is not intended to constitute a contract. Users are responsible for its correct application.

This publication is not to be regarded as a British Standard.

## CONTENTS

FOREWORD.....	10
INTRODUCTION.....	12
<b>Section 1</b> .....	<b>13</b>
Zhaga Interface Specification Book 18.....	13
Summary (informative).....	13
Background.....	13
Contents .....	13
Intended Use.....	13
<b>1</b> General .....	<b>14</b>
1.1    Introduction.....	14
1.2    Scope .....	14
1.3    Conformance and references .....	14
1.3.1    Conformance.....	14
1.3.2    References .....	15
1.4    Definitions .....	16
1.5    Acronyms.....	16
1.6    Symbols.....	16
1.7    Conventions.....	16
1.7.1    Precedence .....	16
1.7.2    Cross references .....	16
1.7.3    Informative text.....	16
1.7.4    Terms in capitals .....	16
1.7.5    Units of physical quantities .....	16
1.7.6    Decimal separator .....	16
1.7.7    Limits .....	17
<b>2</b> Overview (Informative) .....	<b>17</b>
2.1    General.....	17
2.2    Description of the LEX-M, LEX-M base plate, LEX-C and LEX-R.....	17
2.3    Outline of this Book.....	18
Part 1: Interface Definition .....	19
<b>3</b> Mechanical interface.....	<b>20</b>
3.1    Drawing principles .....	20
3.2    Mechanical references .....	20
3.3    Definition of the mechanical interface of the Luminaire Extension Module Base Plate .....	20
3.4    Definition of the mechanical interface of the Luminaire Extension Cap.....	24
3.5    Definition of the mechanical interface of the Luminaire Extension Module.....	24
3.5.1    Recommendation for the keep-in volume of the Luminaire Extension Module .....	25
3.6    Definition of the mechanical interface of the Luminaire Extension Receptacle.....	25
3.7    Definition of the mechanical interface of the Luminaire .....	27
3.7.1    Mechanical interface of a LEX-R on the Luminaire.....	27
<b>4</b> Electrical & Communication Interface .....	<b>28</b>
4.1    Overview (Informative).....	28
4.1.1    Plug-and-Play.....	29
4.2    General.....	29

4.3	Pin assignment at the Luminaire Extension Interface .....	30
4.4	Electrical insulation at the Luminaire Extension Interface .....	30
4.4.1	Insulation requirements for the LEX-R .....	30
4.4.2	Insulation requirements for the LEX-M .....	30
4.5	Auxiliary power supply at the Luminaire Extension Interface .....	30
4.5.1	Auxiliary power supply requirements for the LEX-R:.....	30
4.5.2	Auxiliary power consumption requirements for the LEX-M.....	31
4.6	Pin 4 at the Luminaire Extension Interface .....	31
4.7	DALI communication & DALI bus power at the Luminaire Extension Interface .....	31
4.7.1	DALI communication & DALI bus power requirements for the LEX-R .....	31
4.7.2	DALI communication & DALI bus power requirements for the LEX-M .....	31
Part 2: Compliance Tests .....		32
5	Compliance test tools .....	33
5.1	Test tools for LEX-M and LEX-M base plate .....	33
5.1.1	Mechanical-stop-gauge.....	33
5.2	Luminaire Extension Receptacle test tools .....	33
5.2.1	Contact-making-gauge-min.....	33
5.2.2	Contact-making-gauge-max .....	33
5.2.3	Un-mating-torque-gauge .....	33
6	Luminaire Extension Module Base Plate Compliance Tests .....	33
6.1	Luminaire Extension Module Base Plate mechanical interface tests .....	33
6.1.1	Test of LEX-M Base Plate mechanical dimensions.....	33
6.1.2	Test of LEX-M Base Plate outer diameter .....	35
6.1.3	Test of the LEX-M Base Plate mechanical stop features .....	36
6.1.4	Test of the LEX-M Base Plate sealing surface .....	36
6.1.5	Test of the LEX-M Base Plate contact plating .....	36
7	Luminaire Extension Cap Compliance Tests .....	37
7.1	Luminaire Extension Cap mechanical interface tests.....	37
7.1.1	Test of LEX-C mechanical dimensions.....	37
7.1.2	Test of LEX-C outer diameter .....	37
7.1.3	Test of the LEX-C mechanical stop features .....	37
7.1.4	Test of the LEX-C sealing surface .....	37
8	Luminaire Extension Receptacle compliance tests.....	37
8.1	Luminaire Extension Receptacle mechanical interface tests.....	37
8.1.1	Test of mechanical dimensions.....	37
8.1.2	Test of the LEX-R mating & contact making.....	39
8.1.3	Test of the LEX-R mating and un-mating torque .....	39
8.1.4	Test of the LEX-R contact plating .....	40
9	Luminaire Extension Module compliance tests.....	40
9.1	Luminaire Extension Module mechanical interface tests.....	40
9.1.1	Test of mechanical dimensions.....	40
9.1.2	Test of LEX-M outer diameter.....	40
9.1.3	Test of the LEX-M mechanical stop features.....	41
9.1.4	Test of the LEX-M Plate sealing surface .....	41
9.1.5	Test of the LEX-M contact plating .....	41
9.2	Luminaire Extension Module electrical interface tests .....	41
9.2.1	General .....	41
9.2.2	Test of the LEX-M pin assignment .....	41

9.2.3	Test of the LEX-M AUX power requirements .....	42
9.2.4	Test of the LEX-M DALI communication & DALI bus power requirements.....	42
10	Luminaire compliance tests .....	43
10.1	General.....	43
10.2	Luminaire mechanical Interface tests .....	43
10.2.1	Test of the mechanical interface of the LEX-R .....	43
10.2.2	Test of the keep-out zone of LEX-R(s).....	43
10.3	Luminaire electrical Interface tests.....	43
10.3.1	Test of the number of LEX-Rs.....	43
10.3.2	Test compliance with [D4i Requirements] .....	44
10.3.3	Test on Emergency control gears .....	44
10.3.4	Test of the Luminaire pin assignment .....	44
10.3.5	Test of the Luminaire electrical insulation .....	45
10.3.6	Test of the Luminaire AUX power requirements .....	45
10.3.7	Test of the Luminaire DALI communication & DALI bus power requirements .....	45
Annex A	Application guidelines .....	47
A.1	Street lighting .....	47
A.2	Bottom mounted LEX-M .....	47
Annex B	Mechanical drawing of the Mechanical-stop-gauge .....	49
Annex C	Mech. drawings of the Contact-making-gauge-min and Contact-making-gauge-max .....	50
Annex D	Mechanical drawing of the Un-mating-torque-gauge .....	51
Annex E	LEX-M baseplate and LEX-R mechanical interface tests (Informative) .....	52
E.1	LEX-M baseplate mechanical interface tests .....	52
E.1.1	Test of mechanical dimensions .....	52
E.1.2	Test equipment.....	52
E.2	LEX-R mechanical interface tests .....	52
E.2.1	Test of mechanical dimensions .....	52
Annex F	History of Changes .....	53
<b>Section 2</b>	.....	54
Zhaga Interface Specification Book 1	.....	54
Overview and Common Information	.....	54
1	General .....	55
1.1	Introduction.....	55
1.2	Scope .....	55
1.3	Conformance and references .....	55
1.3.1	Conformance .....	55
1.3.2	Normative references.....	55
1.3.3	Informative references .....	56
1.4	Common definitions .....	56
1.5	Common acronyms .....	58
1.6	Common symbols .....	58
1.7	Common conventions.....	59
1.7.1	Cross references .....	59
1.7.2	Informative text.....	59
1.7.3	Terms in capitals .....	59
1.7.4	Units of physical quantities .....	59

1.7.5	Decimal separator.....	59
2	Overview of Zhaga (informative).....	59
2.1	About Zhaga .....	59
2.2	Zhaga building blocks and interfaces .....	60
2.3	Compatibility and Interchangeability.....	62
2.4	Product Data Set .....	62
2.5	Compliance testing .....	62
2.5.1	Certification .....	62
2.5.2	Market surveillance.....	63
2.6	Compatibility check.....	63
2.7	Zhaga product certification.....	64
3	Mechanical interface.....	64
3.1	Drawing principles .....	64
3.2	Mechanical interface between Separate ECG and Luminaire. ....	64
3.3	Thermal expansion .....	64
3.4	Demarcation (Informative).....	64
4	Photometric interface.....	65
4.1	Light Emitting Surface.....	65
4.1.1	LES categories .....	66
4.2	Operating conditions for measuring photometric parameters.....	66
4.3	Luminous flux .....	67
4.4	Luminous intensity distribution.....	68
4.4.1	Beam angle and beam angle categories.....	68
4.5	Luminance uniformity.....	68
4.6	Correlated color temperature (CCT).....	69
4.7	Color rendering index (CRI) .....	69
4.8	Luminaire Optics (informative) .....	69
5	Electrical interface.....	69
5.1	Electrical insulation (informative).....	69
6	Thermal interface .....	69
6.1	Background information (informative).....	69
6.2	Generic thermal interface model .....	70
6.2.1	General case .....	70
6.2.2	Test Fixture TPTF.....	71
6.2.3	Rated Operating Temperature and safety (informative) .....	72
6.2.4	Thermal overload protection (Informative).....	72
6.2.5	Ambient Temperature .....	72
6.2.6	Luminaires with multiple LLEs or multiple LED Modules.....	72
6.2.6.1	Separate heat sinks .....	72
6.2.6.2	One heat sink .....	73
6.2.7	Thermal compatibility check.....	73
6.2.8	Thermal uniformity .....	74
6.2.9	Thermal Interface Material .....	74
6.2.10	Surface planarity and roughness.....	75
6.2.11	Aging of LED Light Engine or LED Module/LED Array (informative).....	75
6.2.12	Empty .....	75
6.2.13	Ambient Temperature and thermal resistance ( $R_{th}$ ).....	75
6.3	Simplified thermal interface model .....	76

6.3.1	General case .....	76
6.3.2	Rated Operating Temperature and safety (informative) .....	76
6.3.3	Thermal overload protection (informative) .....	76
6.3.4	Thermal compatibility check .....	76
6.3.5	Thermal Interface Material .....	76
6.3.6	Surface planarity and roughness .....	76
6.3.7	Aging of LED Light Engine or LED Module/LED Array (informative) .....	76
7	Control interface .....	76
Annex A	Compliance tests .....	77
A.0	LED Module/LED Array compliance tests .....	77
A.0.1	LED Module/LED Array mechanical interface test .....	77
A.0.1.1	Test in the mechanical interface or the LED Module/LED Array .....	77
A.0.1.1.1	Test equipment .....	77
A.0.1.1.2	Test conditions .....	77
A.0.1.1.3	Test procedure .....	77
A.0.1.1.4	Pass criteria .....	77
A.0.2	LED Module/LED Array photometric interface tests .....	77
A.0.2.1	Test on Luminous Flux .....	77
A.0.2.1.1	Test equipment .....	77
A.0.2.1.2	Test conditions .....	77
A.0.2.1.3	Test procedure .....	77
A.0.2.1.4	Pass criteria .....	78
A.0.2.2	Test on Relative Partial Luminous Flux and beam angle .....	78
A.0.2.2.1	Test equipment .....	78
A.0.2.2.2	Test conditions .....	78
A.0.2.2.3	Test procedure .....	78
A.0.2.2.4	Pass criteria .....	78
A.0.2.3	Test on correlated color temperature (CCT) .....	78
A.0.2.3.1	Test equipment .....	78
A.0.2.3.2	Test conditions .....	79
A.0.2.3.3	Test procedure .....	79
A.0.2.3.4	Pass criteria .....	79
A.0.2.4	Test on color rendering index .....	79
A.0.2.4.1	Test equipment .....	79
A.0.2.4.2	Test conditions .....	79

INTERNATIONAL ELECTROTECHNICAL COMMISSION

**ZHAGA INTERFACE SPECIFICATION BOOK 18 INCLUDING BOOK 1 –  
OUTDOOR LUMINAIRE EXTENSION INTERFACE**

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

A PAS is an intermediate specification made available to the public and needing a lower level of consensus than an International Standard to be approved by vote (simple majority).

IEC PAS 63421 has been processed by IEC technical committee 34: Lighting.

The text of this PAS is based on the following document:

This PAS was approved for publication by the P-members of the committee concerned as indicated in the following document

<b>Draft PAS</b>	<b>Report on voting</b>
34/890/DPAS	34/900/RVDPAS

Following publication of this PAS, which is a pre-standard publication, the technical committee or subcommittee concerned may transform it into an International Standard.

This PAS shall remain valid for an initial maximum period of 2 years starting from the publication date. The validity may be extended for a single period up to a maximum of 2 years, at the end of which it shall be published as another type of normative document, or shall be withdrawn.

**IMPORTANT – The "colour inside" logo on the cover page of this document indicates that it contains colours which are considered to be useful for the correct understanding of its contents. Users should therefore print this document using a colour printer.**

## INTRODUCTION

This PAS is a reproduction of Zhaga Book 1 Edition 1.9 and Book 18 Edition 2.0 with no change introduced.

The document layout, terms, and definitions, etc within this PAS therefore do not follow the IEC drafting rules that would be applied for an International Standard.

Section 1 comprises Zhaga Book 18 Edition 2.0 – Outdoor Luminaire Extension Interface.

Section 2 comprises Zhaga Book 1 Edition 1.9 – Overview and common information.

Zhaga Book 1 is essential to the interpretation of Zhaga Book 18 (and other Zhaga books).

The intention is for the content of this PAS to be incorporated within one or more International Standards following the IEC Directives and drafting rules.

## **Section 1**

### **Zhaga Interface Specification Book 18**

#### **Summary (informative)**

##### **Background**

Zhaga is a global association of lighting companies that is standardizing interfaces of components of LED luminaires, including LED light engines, LED modules, LED arrays, holders, electronic control gears (LED drivers), sensors, communication modules and connectivity fit systems. This helps to streamline the LED lighting supply chain, and to simplify LED luminaire design and manufacturing. Zhaga continues to develop specifications based on the inter-related themes of interoperable components, smart and connected lighting, and serviceable luminaires.

##### **Contents**

This Book 18 defines a standardized interface between a LED Luminaire and a sensing/communication module (Luminaire Extension Module, LEX-M) that can be attached to the Luminaire. The interface is intended to be used in outdoor applications with high IP rating. The LEX-M may provide for example sensory inputs to the Luminaire or communication between the Luminaire and a network.

This Book should be read together with Zhaga Book 1.

##### **Intended Use**

The Luminaire Extension Module, Luminaire Extension Cap and Luminaire Extension Receptacle defined in this Book 18 are intended to be installed and replaced by professionals only.

## 1 General

### 1.1 Introduction

Zhaga is a global association of lighting companies that is standardizing interfaces of components of LED luminaires, including LED light engines, LED modules, LED arrays, holders, electronic control gears (LED drivers), sensors, communication modules and connectivity fit systems. This helps to streamline the LED lighting supply chain, and to simplify LED luminaire design and manufacturing. Zhaga continues to develop specifications, called books, based on the inter-related themes of interoperable components, smart and connected lighting, and serviceable luminaires.

Book 1 is a special Book in the sense that it provides common information, which is relevant to all other Books in the series. In addition, Book 1 defines requirements and compliance tests, which are applicable across multiple Zhaga books. Such Books refer to those requirements and compliance tests as applicable.

### 1.2 Scope

This Book 18 defines a standardized interface between a LED Luminaire and a sensing/communication module (Luminaire Extension Module, LEX-M) that can be attached to the Luminaire. The interface is intended to be used in outdoor applications with high IP rating. The LEX-M may provide for example sensory inputs to the Luminaire or communication between the Luminaire and a network.

For attaching the LEX-M to the Luminaire, the Luminaire features one or two Luminaire Extension Receptacles (LEX-R) and the LEX-M features a base plate. Figure 1-1 shows an informative 3D-drawing of the LEX-R and the LEX-M base plate.

### 1.3 Conformance and references

#### 1.3.1 Conformance

All provisions in the Zhaga interface Specifications are mandatory, unless specifically indicated as recommended, optional or informative. Verbal expressions of provisions in the Zhaga interface specifications follow the rules provided in ISO/IEC Directives, Part 2. For clarity, the word "shall" indicates a requirement that is to be followed strictly in order to conform to the Zhaga interface specifications, and from which no deviation is permitted. The word "should" indicates that among several possibilities one is recommended as particularly suitable, without mentioning or excluding others, or that a certain course of action is preferred but not necessarily required, or that (in the negative form) a certain possibility or course of action is deprecated but not prohibited.
