

BSI Standards Publication

Space product assurance — Components reliability data sources and their use

National foreword

This Published Document is the UK implementation of CEN/TR 17602-30-08:2021.

The UK participation in its preparation was entrusted to Technical Committee ACE/68, Space systems and operations.

A list of organizations represented on this committee can be obtained on request to its committee manager.

Contractual and legal considerations

This publication has been prepared in good faith, however no representation, warranty, assurance or undertaking (express or implied) is or will be made, and no responsibility or liability is or will be accepted by BSI in relation to the adequacy, accuracy, completeness or reasonableness of this publication. All and any such responsibility and liability is expressly disclaimed to the full extent permitted by the law.

This publication is provided as is, and is to be used at the recipient's own risk.

The recipient is advised to consider seeking professional guidance with respect to its use of this publication.

This publication is not intended to constitute a contract. Users are responsible for its correct application.

English version

Space product assurance - Components reliability data sources and their use

Assurance produit des projets spatiaux - Sources de
données de fiabilité composants et leur utilisation

Raumfahrtproduktsicherung - Datenquellen zur
Bauteilezuverlässigkeit und ihre Anwendung

This Technical Report was approved by CEN on 22 November 2021. It has been drawn up by the Technical Committee CEN/CLC/JTC 5.

CEN and CENELEC members are the national standards bodies and national electrotechnical committees of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and United Kingdom.

Table of contents

European Foreword	4
1 Scope	5
2 References	6
3 Terms, definitions and abbreviated terms	7
3.1 Terms from other documents.....	7
3.2 Abbreviated terms.....	7
4 Selection of reliability data and methods	8
4.1 Introduction.....	8
4.2 Selection process	8
4.3 Description of data.....	11
4.3.1 Handbook reliability data	11
4.3.2 Manufacturer or user data	11
4.4 Selection criteria for input sources	11
4.4.1 Reliability handbooks	11
4.4.2 Manufacturer or user data	12
4.5 Justification for choice	14
4.6 Instructions for use	15
4.6.1 Reliability handbooks	15
4.6.2 Manufacturer or user data	15
4.7 Considerations for reliability prediction for mechanical parts.....	16
4.7.1 General	16
4.7.2 Part failure data analysis	17
4.7.3 Empirical reliability relationships.....	17
4.7.4 Analysis of the stress-strength	17
4.7.5 Handbook data.....	18
4.8 Documentation	18
Annex A Potential data sources	19
A.1 Introduction.....	19
A.2 EEE parts	19

A.2.1	AT&T reliability manual	19
A.2.2	FIDES (UTE C 80-811)	19
A.2.3	HRD5	19
A.2.4	IEEE Gold Book	20
A.2.5	IRPH	20
A.2.6	MIL-HDBK-217	20
A.2.7	PRISM (RAC / EPRD)	20
A.2.8	RDF 2000 (UTE C 80-810, IEC-62380-TR Edition 1)	20
A.2.9	Siemens SN29500	21
A.2.10	Telcordia SR-332	21
A.3	Mechanical parts	21
A.3.1	NPRD-95	21
A.3.2	NSWC-94/L07 - Handbook of Reliability Prediction Procedures for Mechanical Equipment	22
Annex B Applicability and limitations of MIL-HDBK-217F		23
B.1	Introduction	23
B.2	EEE families applicability matrix	23
B.3	EEE packages applicability matrix (based on paragraph 5.6 MIL-HDBK-217)	26
B.4	EEE part equivalent quality grades	26
Annex C Justification		28
Bibliography		30
Figures

European Foreword

This document (CEN/TR 17602-30-08:2021) has been prepared by Technical Committee CEN/CLC/JTC 5 "Space", the secretariat of which is held by DIN.

It is highlighted that this technical report does not contain any requirement but only collection of data or descriptions and guidelines about how to organize and perform the work in support of EN 16602-30.

This Technical report (CEN/TR 17602-30-08:2021) originates from ECSS-Q-HB-30-08A.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN [and/or CENELEC] shall not be held responsible for identifying any or all such patent rights.

This document has been prepared under a mandate given to CEN by the European Commission and the European Free Trade Association.

This document has been developed to cover specifically space systems and has therefore precedence over any TR covering the same scope but with a wider domain of applicability (e.g.: aerospace).

1

Scope

This handbook identifies data sources and respective methods that can be used for reliability prediction of components. It proposes suitable data sources and an application matrix for component families.
